Unleash Your Full Business Potential

| MAXXCONVERTER EDMS MIGRATION SERVICES

Are you currently held hostage by a proprietary imaging system and need to migrate to an open source platform?

MaxxVault can help. MaxxVault engineers streamline the document conversion process for you with the MaxxConvert EDMS migration tool.

MaxxConvert takes documents out of proprietary systems for import into a replacement solution, complete with images and index field data.

If you haven't decided on a replacement system, be comforted in knowing MaxxVault engineers have been involved with implementing and supporting systems such as OpenText, FileNet, as well as many other vendors for several years now. Perhaps you are reviewing

options such as Microsoft Sharepoint or MaxxVault Enterprise or even a cloud solution such as MaxxVault ASP. Our trained engineers can provide project management for a turn-key solution that is right for you.

Fully Auditable Migration

Regardless of how long your current EDM system has been in place, or the number of documents and processes, MaxxConvert will conduct a thorough audit of your content for you, so you can rest assured all documents will be accounted for.
