

# Simple just got easier.

Unleash Your Full Business Potential with  
MaxxVault Document Management

## | OPTICAL CHARACTER RECOGNITION

**You implement an electronic document management system to help you find documents quicker, process information faster and make your corporate information more readily available.**

However, scanned images are just pictures to a computer. There is information in those images that would, ideally, be searchable. Thankfully, there is OCRVault which can turn that image into a text document, fully searchable and editable.

OCRVault can take your TIFF and PDF documents, using the most advanced Optical Character Recognition technology available, and accurately translate these once static images into text documents. MaxxVault can then use the text to populate index values and trigger workflow and filing rules. Imagine, a piece of paper goes into the scan feeder and is suddenly indexed and properly filed with fully editable content. You now have the ability to manipulate the information or to find content

using a full text search. Each of these tasks would have required tedious data entry to recreate the document or long hours of reading through documents.

Increase your office efficiency and access to information with OCRVault!

### Features:

- Provides text to: TIFF and PDF
- Enables flat scans to be full text searchable
- Captures text from the page to use in Indexes
- Enables searching of scans based on content
- Search by content can allow for faster returns
- Text can be edited

## Benefits of OCR

No Re-typing – lost electronic files can be restored from physical printed copies

Auto Indexing – Captured text can be used in searchable index fields

Quick search – content of documents can be searched in seconds – impossible with physical files

Accessibility – electronic text can be presented larger or with text-to-speech software for the visually impaired

Save Space – Millions of pages on one hard drive

Power Search – Search not restricted by language

### Characters

- Machine Print and Dot Matrix text in any of the following 11 languages:
- Danish
- English (US or UK)
- German
- Norwegian
- Spanish
- Dutch
- French
- Italian
- Portuguese
- Swedish
- Plus, recognition of:
- Russian, Chinese Simple, Chinese Traditional, Japanese and Korean characters.

### Image Input

OCRVault will read images from either file or memory in the following formats:

- TIFF (single or multi-page) all compression types
- PDF

Valid resolutions include 200, 240, 300, 400, and 600 DPI as well as Standard or Fine FAX.

### Image Enhancement

Improves image quality for better OCR using features such as:

- Deskew
- Despeckle
- Image Registration
- Image rotation
- Line Removal

**Up to 6 OCR Engines** - Add a 4th, 5th or a 6th engine for up to 83% fewer errors.

**Character Training** - OCRVault can be trained to recognize specific character sets or fonts.

**Multi-Processor Support** - Use up to four processors in a multi-CPU system.
